ABOUT ME

I am Aykhan Alizade, a student of electrical and electronics engineering. My keen interest in computers since childhood led me to coding websites and programming language basics. My interest in the world of computers led me to pursue a career in technology and hence I am studying Electrical and Electronics engineering. I acquire both theoretical knowledge and practical skills. As a proactive learner and problem solver, I have the ability to solve complex problems. At the same time, I have the skills needed to deliver projects along with being disciplined and working in a team. In the future, I plan to continuously improve my knowledge and skills in order to contribute to technological developments and provide innovative solutions. As an energetic and motivated individual, I believe in succeeding and growing in a team environment.

EDUCATION

2022 - Present

Bachelor Degree
Azerbaijan State Oil and İndustry University
Faculty: Energy
Speciality: Electrical and Electronics Engineering

EXPERİENCE

07.2023 - 09.2023

Destech Training and Consulting
İntern

I participated in an internship program advertised by Destech Training and Consulting and participated in social networking and interior design work using my Graphic Design skills and technologies. I also got a chance to improve my teamwork skills here.

07.2023 - 09.2023

Baku American Center
İntern

During my voluntary internship at the institution, I gave detailed information about the foundations and technologies of Front End Programming to selected students and taught them my ability to work with these technologies. By strictly following the weekly lesson plans, I ensured that the students fully mastered the syllabus and regularly gave reports to the management about the teaching process.

Computer Skills
